HORIZONTAL CABLE DUCTS

2RU Horizontal Cable ducts may be used to bridge cables across racks, these ducts feature finger openings that come with plastic cable protectors to guide the cables smoothly without the risk of sharp bends occurring. These fingers run along both sides of the duct. The unit is also fitted with a cover.

Constructed in steel and come with a black powder coat finish.

ROOF CABLE DUCT

This 2 stage fully adjustable cable duct extends from 450mm to 850mm. The addition of a third section extends it up to a further 400mm. Mounts directly onto the roof gland plate opening. Both sections are in two parts allowing the duct to be assembled around existing cabling. Powder coat finish in customer choice of colour. Suits all cabinets with top gland plate including wall mount cabinets.

Note: The third section is the lower section mounted upside down.
