

AUSTIN HUGHES

DEDICATED KVM SWITCH & RACKMOUNT SCREEN TECHNOLOGY

MFB are the distributor for Austin Hughes CyberView range of KVM switch and rack mount technology. These products are chosen for their reliability, longevity, and versatility for all applications. Austin Hughes manufactures an extensive range of KVM switches, LCD monitors and keyboard drawers. The keyboards are available in standard notebook or cherry style and can be fitted with touchpads or a trackball. There are 1RU and 2RU versions available with options for fixed and pull out screens, with or without 8 port or 16 port KVM switches at the rear.

Austin Hughes has many years of electro mechanical design experience in industrial LCD display solutions. They are advancing design boundaries to offer LCD wide screen technology using only Samsung grade A industrial panels, that support a greater range of applications on our hardware solutions. Available in both 19" and 22" screens.

1RU LCD KEYBOARD / KVM DRAWER

2RU DUAL SLIDE LCD KEYBOARD / KVM DRAWER

KVM BOXES

KVM Boxes are available in 8, 16, and 32 port configurations, utilizing Cat 6 or DB15 inputs. The units can be multi user or single user configured.

Options also include secure IP user access across the web. Efficient system management with simultaneous multi-user access, the capability to connect 8, 16, or 32 servers per device in 1RU, and the ability to support DVI-USB VGA-USB & VGA-PS2 server interfaces.

RACK MOUNT LCD

Rack mount LCD displays are available in 7RU/19" and 8RU/22" widescreen versions. These A grade Samsung industrial panels are ideal for CCTV security and Industrial control. Options also include 12v, 24v, or 28v power, touchscreen capabilities, and quad display selection.

SCREEN TECHNOLOGY

All units use grade A industrial panels supplied by Samsung® with ultra high resolution in 17", 19", and 20" screens sizes.
